

CHATHAM COUNTY
ECONOMIC DEVELOPMENT
CORPORATION

TO: Brian Bock, Chair, Chatham County Board of Commissioners
FROM: Chatham County Economic Development Corporation
RE: **Western Wake Partners Pipeline Request**

The Board of Directors of the Chatham County Economic Development Corporation believes in a partnered regional approach to positively impact economic development. This includes the development of infrastructure and collaborations that benefit both Chatham and the region as a whole.

To this end, the Board supports the request from the Western Wake Partners (WWP) for a treated wastewater pipeline to cross through 8.1 miles of Chatham County. The Chatham County Commissioners are further supported and encouraged in their endeavors to negotiate, in good faith, the most effective benefits to the residents of Chatham County from this approval.

Further, the Board supports and encourages continued collaboration on all regional initiatives that benefit the economic endeavors of Chatham County. This includes the current Cary / Chatham joint land use development discussions. It is recommended that these discussions be leveraged through the negotiations on the wastewater request and other initiatives to provide a holistic approach to regional collaboration of mutual benefit to all parties.

Resolved, this day, February 17, 2011
Board of Directors
Chatham County Economic Development Corporation
